

# GoodWe Home Battery

Built for bigger households and higher energy demand.

| Key Specifications        |                                   |
|---------------------------|-----------------------------------|
| Capacity                  | 9.6 – 22.4kWh                     |
| Chemistry                 | LFP                               |
| Inverter                  | GoodWe Lynx hybrid inverter range |
| Usable depth of discharge | High usable capacity              |
| Cycle life                | Long-life LFP cells               |
| Efficiency                | High round-trip efficiency        |
| Protection rating         | Outdoor-rated options available   |
| Warranty                  | 10 years                          |

GoodWe's All-in-One series stacks modular battery blocks in a single tower, designed for larger households and higher energy demand — strong backup capacity for bigger appliances, with tight integration between GoodWe's own inverters and batteries.
